VOLVO PENTA EVC SYSTEM

AUTOPILOT INTERFACE

Designed for Volvo Penta IPS system or Volvo Penta Aquamatic with electronic steering

Pick a destination and let the autopilot do the rest

It’s like a dream come true. The ultimate boating experience. Let the autopilot take care of the driving – but with you in charge.

Autopilot interface

Now it is possible to connect an autopilot from certified suppliers. You then get a complete system for a perfect boat trip. The autopilot interface makes it possible to connect an autopilot to the Volvo Penta IPS system or Volvo Penta Aquamatic with electronic steering.

Get the perfect boat trip

The system is matched for best performance and smooth cruising to your decided destination.

With this system you can, in a simple and easy way, pick one or more destinations and let the autopilot take care of the driving. But you will still have to stay in charge.

EVC Accessories

Smart accessories that make boating simpler and more environmentally friendly. Plug-in installation of instruments, active monitoring and troubleshooting, engine data in the chart plotter and the ability to upgrade the boat’s functions at a later date. It’s quick and easy to install Volvo Penta EVC Accessories in a boat equipped with Volvo Penta EVC. These are some of the options available with Volvo Penta’s electronic platform, EVC

World-class performance

All Volvo Penta EVC Accessories is developed, designed & serviced by Volvo Penta. This means that it’s function is perfectly matched with your Volvo Penta engine. Find out more about EVC Accessories on our website.
AUTOPilot INTERFACE

Features:

• Autopilot interface: Makes it possible to connect an autopilot to the Volvo Penta IPS system or Volvo Penta Aquamatic with electronic steering.

Note! Only possible from certified suppliers.

For certified suppliers of autopilot, please contact your local Volvo Penta dealer.

Volvo Penta EVC System

EVC – Electronic Vessel Control – is Volvo Penta’s common electronic platform. Based on the same CAN-bus technology used in ships, planes and cars, EVC gives total integration. All information is distributed on one CAN-bus backbone. This radically reduces the amount of wiring and connectors required, leading to much higher reliability and easier installation.

EVC offers improved functionality as standard or option. Features that are impossible with standard systems and give you better safety, comfort and driving economy. Please contact your local Volvo Penta dealer for more information regarding Volvo Penta engines and Volvo Penta EVC system.
